PROFILE

I'm a design-oriented frontend developer dedicated to building thoughtful user experiences, collaborating on beautiful and accessible web products, and bringing creative vision to responsive applications.

SKILLS

Languages: JavaScript, TypeScript, HTML, CSS
Frontend: React, Vue, Next.js, React Native, Storybook, Tailwind, Nuxt, Styled Components, Bootstrap, Material UI, GraphQL, ThreeJS
Backend: Node.js, Firebase, PostgreSQL, Prisma
Tools and Services: Github, Figma, Vercel, Netlify, Postman, Datadog, CommerceTools, Algolia, Lucidchart, Cursor

EXPERIENCE

Frontend Software Engineer
Jan 2024 - Aug 2025
Powell's Books - Portland, OR

- Led the Storybook implementation for our Vue codebase, making it possible for the team to develop and maintain consistent, reusable components and increase frontend velocity.
- Championed accessibility and responsive design site-wide, using audits and hands-on improvements to create a more inclusive user experience.
- Solved tough integration challenges - connecting CommerceTools, Algolia, and multiple third-party services, while navigating breaking changes and infrastructure upgrades.
- Established regular team check-ins and knowledge sharing within the frontend group, helping us stay collaborative and focused, even without traditional management.
- Learned to thrive and adapt quickly, often defining my own role, owning feature delivery from start to finish, and stepping up to communicate blockers and needs across teams.

Software Engineer
Dec 2020 - Present
Freelance/Independent

- Collaborate with other developers on side projects, workflow and design.
- Design, build and ship self-directed web and mobile projects using React, TypeScript, Next.js, Tailwind, Node.js, and Three.js.
- Develop and integrate fullstack features with custom APIs and PostgreSQL or Prisma databases.
- Create interactive animations and visuals with Three.js and Framer Motion.

Fullstack Software Engineer
May 2021 - March 2023
Olio Apps - Portland, OR

- Independently developed the frontend for two React Native mobile apps, including a barometric pressure tracker for *EarPlanes* product line.
- Led a three-person team to develop a solar panel installation quote app - built core frontend features, contributed to cloud functions, and thoroughly tested the quote calculator.
- Contributed significantly to the frontend of a decarbonization platform, building responsive dashboard components and intricate forms for entering detailed building specifications.
- Specialized in atomic design and trained team members in Storybook-driven development for scalable, consistent UI components.
- Collaborated directly with three clients on testing, debugging, and iterating based on feedback.

Graphic Designer, Marketing Assistant
Jan 2017 - Dec 2019

Freelance

- Upheld mission of brands via graphic design, Wordpress editing, keyword mapping and other SEO tasks.
- Expanded skillset in accordance with business needs and sought feedback in order to deliver high quality product.

Graphic Designer, Manager
Jan 2013 - Dec 2017

The Stensrud Playhouse - Missoula, MT

- Delivered successful marketing plans resulting in at least 25 sold-out shows.
- Strengthened the relationship with the community by developing a large social media following and website.
- Managed sales, box office, kitchen operations and staff, and designed all paper and digital materials.

EDUCATION

Alchemy Code Lab
Dec 2020

Fullstack JavaScript Certificate - Portland, OR

800+ hour full stack software development program. JavaScript, HTML, CSS, React, and PostgreSQL with an emphasis on test-driven development and collaboration.

Santa Monica College

Anthropology - Santa Monica, CA

AWARDS

Women's Education Scholarship
June 2020

Portland Women in Tech (PDXWIT)

The purpose of PDXWIT is to encourage and empower those who identify as women, non-binary and underrepresented to join and stay in tech.
